

---

INDUSTRIAL AUTOMATION AND ENGINEERING

# Less manual work. More certain production.

Engineering partner from system design through  
implementation and lifecycle support.

COMPANY PROFILE

2026

---

**WHY ICI**

# Engineering ownership across the whole system.

ICI Industrial Systems helps manufacturers reduce manual work, improve production visibility, and strengthen operational reliability through integrated engineering and automation.

**120+**

PROJECTS DELIVERED

**35+**

INDUSTRIAL CLIENTS

**8+**

YEARS IN OPERATION

**12**

ENGINEERING SPECIALISTS

---

INTEGRATED CAPABILITY

# One team from signal to production decision.

01

## Industrial Automation

PLC, SCADA, motion, safety, and line control architecture.

02

## Robotics

Integrated handling and process cells designed around takt and changeover.

03

## Machine Vision

Inspection, verification, measurement, and traceability at line speed.

04

## Industrial IoT

Live production monitoring, OEE, downtime, energy, and alerts.

05

## Manufacturing Software

Dashboards, APIs, and applications connecting plant workflows.

06

## Preventive Maintenance

Planned care, retrofit, support, and continuous optimization.

## SELECTED PROJECT

# Automated visual inspection.

Automotive component manufacturer

A machine vision inspection system integrated with the production line, delivered within a maximum eight-hour installation window.

62%

faster inspection

98.7%

detection accuracy

70%

lower manual workload

LIVE

production data

CAMERA > EDGE COMPUTER > PLC > PRODUCTION API > DASHBOARD

## SELECTED PROJECT

# Packaging line monitoring.

## FMCG manufacturer

Frequent packaging machine downtime had no centralized monitoring. ICI connected the line to an IoT monitoring layer and SCADA dashboard so the team could see, classify, and act on losses.

# 28%

### REDUCTION IN UNPLANNED DOWNTIME

Measured within six months of operation

## OUR ENGINEERING PROCESS

# A controlled path to stable operation.
